## How to set up your IMAP e-mail address with Windows 10 mail

The following instructions will configure Windows 10 Mail for your mail account. This configuration will require your:

Username	This is the same as your e-mail address (ex. example@pspinc.com)
Password	The same password as your mail account
Incoming Server	imap.dreamersi.net

Outgoing Server (SMTP).. smtp.dreamersi.net

1a. If this is your first time using Windows 10 mail you will be presented with the Welcome screen. Click **Get started** to go to the accounts screen.

Click Add account to go to the Choose an account screen.

1b) If you have used Windows 10 Mail before you will want to click on the **gear icon** in the lower right, and a new column will open on the right, Settings.

Under settings select the first option, **Manage Accounts**, and then **Add account** to go to the Choose an account screen.

Settings Manage Accounts Personalization Quick Actions Automatic Replies Reading

2. On the Choose an account screen scroll to the bottom and select Advanced setup.

		×
Choose an account		
E Exchange Exchange, Office 365		
Google		
Yahoo! Mail		
iCloud		
Other account POP, IMAP		
Advanced setup		
	Close	

3. Select **Internet Email** POP or IMAP accounts that let you view your email in a web browser.

	×
Advanced setup Choose the kind of account you want to setup. If you're not sure, check with your service provider.	
Exchange ActiveSync Includes Exchange and other accounts that use Exchange ActiveSync.	
POP or IMAP accounts that let you view your email in a web browser.	

4. Enter the following information (This is just an example) When you are done scroll down for the next set of fields.

Account name	John Doe
Your Name	John Doe
Incoming email server	imap.dreamersi.net
Account type	IMAP4

Account name	
John Doe	
Your name	
John Doe	
, , , ,	uno nume.
Incoming email server imap.dreamersi.net	
Incoming email server imap.dreamersi.net Account type	
Incoming email server imap.dreamersi.net Account type IMAP4	

5. Enter the following information (This is just an example) When you are done scroll down for the final options.

Email address	john_doe@pspinc.cor	n
User Name	john_doe@pspinc.con	n
Password	The same password as	s your email account
Outgoing (SMTP)	smtp.dreamersi.net	:465
email server		
Internet er	mail account	
Email address	5	^
john_doe@	pspinc.com	

User name

john\_doe@pspinc.com

Examples: kevinc, kevinc@contoso.com, domain\kevinc

Password

•••••

Outgoing (SMTP) email server

smtp.dreamersi.net :465

 $\times$ 

Cancel

Sign in

6. For standard secure (SSL) setup you can simply leave the check boxes alone and just hit **Sign in** and you will be taken to the Windows 10 Mail main screen where it will start to download your mail.

Internet email account				
Password				
•••••				
Outgoing (SMTP) email server				
smtp.dreamersi.net :465 ×				
Outgoing server requires authentication				
Use the same user name and password for sending email				
Require SSL for incoming email				
Require SSL for outgoing email				
Cancel Sign in				

## Non-SSL Setngs Only

For non-SSL mail you will need to change the incoming and outgoing email servers and uncheck <u>Require SSL for incoming mail</u> and <u>Require SSL for outgoing mail</u> at the bottom before hitting **Sign in**.

Incoming email server....imap.dreamersi.netOutgoing (SMTP).....smtp.dreamersi.net

Cancel

Internet email account Password ..... Outgoing (SMTP) email server smtp.dreamersi.net :465 Outgoing server requires authentication Use the same user name and password for sending email Require SSL for incoming email Require SSL for outgoing email
